Ahmad Raza

Full Stack Web Developer (MERN) & CMS Specialist

Full Stack Web Developer with hands-on experience building business-focused websites, ecommerce platforms, and scalable web applications using the MERN stack and modern CMS ecosystems. Combines React, Node.js, MongoDB, WordPress, and Shopify expertise to deliver fast, conversion-aware digital products with strong performance and SEO foundations. Trusted to lead delivery, align timelines, and collaborate across design, marketing, and technical teams. Experience collaborating with AI developers to build integrated solutions that connect frontend experience, backend systems, and business goals.

CORE EXPERTISE

Web Application Development
MERN

Build responsive, maintainable web applications with React, Node.js, Express, and MongoDB for business workflows and user growth.

API Integration & Backend Systems
BACKEND

Connect frontend experiences with APIs, third-party services, and operational systems to support complete, usable solutions.

Performance Optimization & SEO
QUALITY

Improve page speed, structure, and search visibility to create better user experience and stronger commercial performance.

UI/UX & Conversion Optimization
UX

Shape interfaces that are clear, responsive, and aligned with business intent, helping users move smoothly from discovery to action.

Project Leadership & Team Collaboration
DELIVERY

Lead implementation work, coordinate cross-functional input, and keep project delivery moving with ownership, clarity, and execution discipline.

PROFESSIONAL EXPERIENCE

WordPress Developer & Team Leader

Lloyds Knight • June 2025 – Present

- Led delivery of WordPress and ecommerce projects for business clients, translating commercial goals into production-ready web solutions from build through launch
- Directed a small development team, managed timelines, and kept execution aligned with client requirements and internal priorities
- Built and customized WordPress themes, WooCommerce stores, and UI components that improved usability, product presentation, and conversion-focused page structure
- Improved website performance, responsiveness, and technical SEO to support faster load times and a stronger user experience
- Collaborated with designers, marketers, and stakeholders to deliver polished digital experiences that balanced brand, speed, and business outcomes
- Contributed beyond CMS delivery by supporting solution planning, implementation quality, and scalable technical decisions

Web Developer

Technogic Systems • Oct 2023 – Apr 2025

- Delivered WordPress and Shopify websites for agency clients across multiple industries, handling both new builds and iterative improvements with dependable execution
- Built responsive frontend interfaces using HTML, CSS, and JavaScript, improving consistency across devices and creating cleaner user journeys
- Implemented ecommerce functionality, payment integrations, and store enhancements that supported smoother customer transactions
- Improved site speed, on-page SEO, and structural quality to strengthen discoverability and overall performance
- Maintained and upgraded live websites while protecting business continuity, content accuracy, and client expectations
- Built a stronger foundation for full stack work by combining CMS execution with frontend development, API awareness, and product-minded delivery

KEY PROJECTS

DevX – Inventory Management System
MERN STACK

Developed a comprehensive inventory management dashboard featuring real-time order tracking, sales analytics, and multi-city performance metrics. Implemented interactive charts, product inventory tables, and a responsive admin interface to streamline business operations and improve decision-making.

View Project →

Euro Mattress
WORDPRESS, WOOCOMMERCE

Developed a premium mattress ecommerce platform that simplified product discovery and presented buying information with greater clarity. Structured the shopping flow for cleaner navigation, stronger product storytelling, and a more efficient path to purchase.

View Project →

Cerberus Security
WORDPRESS

Created a corporate security website positioned to build trust with prospective clients and communicate services with clarity. The result was a professional, responsive web presence that strengthened credibility and supported lead-focused engagement.
